Journal of Dental Technology's  
**WOW!**  
2011

**WOW! Products Awards**

*Save time, save money and  
improve quality with these hot titles.*

**Also:**

*Learn a simple technique for  
shade matching centrals.*

**Meet your NADL and NBC  
candidates for election.**

CAP FZ is an American-made, full zirconia crown. The aesthetic difference starts with CAP FZ's unique German manufactured zirconia which has a translucency that closely mimics natural dentition. Next, the CAP's high definition anatomical library is used to design beautiful form. The crown is milled with precision to ensure exceptional marginal adaptation and fit. A multishade procedure in the pre-sintered state gives it depth with intrinsic lifelike color.

**Cost:** Starting at \$57 when sending design files, \$76 when sending models

**Contact:** 877-977-7889, info@cap-us.com or www.cap-us.com/fz

**Saves Time:** No need to layer ceramics because CAP's MultiShading creates a crown with depth and lifelike color that requires minimal surface staining.

**Saves Money:** Eliminates a significant amount of labor in building the crown and enables laboratories to offer a price-stable alternative to expensive PFM and full gold crowns.

**Improves Quality:** This is a strong crown with a flexural strength of 1100 MPa and a lifetime warranty against breakage.

**WOW! Factor:** "The anatomy is awesome and looks like a tooth should look." — WOW! Nomination
